

WHAT CAN
AI DO FOR
YOU?

Who Am I?

After decades of success in the music business in Europe and the US, my online community membership site, Cybertown:

- Was built in 1995
- Grew to **1.3 million members**
- Was receiving **1.5 billion hits a year** before I sold it
- Was in the **top 2500 sites in the world** in terms of traffic
- Was featured on **TV shows and magazines** around the world for many years
- Attracted partnerships with **USA Networks Sci-fi Channel, Sony Interactive, Intel, Hallmark Entertainment, SETI, Centropolis Entertainment** (producers of “Independence Day”, “Godzilla” and “The Patriot” movies), **Warner Brothers, Star Trek** and many others
- Was sold to an online European VR technology company in 2002
- Making videos, live streaming, and doing Internet marketing consulting for last 25 years, and digging deeply into AI, and now involved in video podcasting and various Metaverse projects involving cutting-edge technologies, and the return of Cybertown.

THE CYBERTOWN MAP

In the late '90s for the Web is Cybertown, a city also created with Blaxxun Interactive software. It features a virtual auditorium, spaceport, news center, and other facilities such as a park with a pool. The city is populated by avatar "residents" who have homes,

The Road to CyberTown

Construction of a system on the Internet has been a long and arduous process. It has involved the creation of a network of servers and clients, the development of protocols and standards, and the implementation of a variety of services. The result is a global network of computers that can communicate with each other. This network is the foundation of the Internet, and it is the road to CyberTown.

Talk of the town

The town of CyberTown is the latest in a series of virtual communities. It is a place where people can interact with each other in a virtual world. The town is built on a network of servers and clients, and it is the foundation of the Internet.

Bright sites, big city

WHAT WE'LL COVER

- What is AI?
- The AI frenzy
- What can AI tools do?
- How to use AI for content creation
- How to use AI for image & video creation
- Other AI tools
- The future – and who will be out of jobs – and how not to be

WHAT IS AI?

Artificial intelligence tools are computer programs that use machine learning to mimic the problem-solving and decision-making capabilities of the human mind.

WHERE IS AI AT?

There are now more than 3,000 such tools, in more than 50 categories, with many, many more being released every single day.

It is predicted that there will be 10,000 by the end of 2023.

The screenshot displays a dark-themed website interface for an AI tool directory. At the top right, it says "Top Picks". Below this are several rows of category buttons: "View All", "All Free", "Avatar Creation", "Social Media", "Video Editing", "Speech Generation", "AI Detectors", "Teachers", "Students", "Chatbots", "Writing", "Marketing", "Coding", "Finance", "Data", "Fun", "Inspiration", "Generative Art", "Video Creation", "Music", "Prompting", "Productivity", "Business", "Self Improvement", "Tool Databases", "AI Communities", and "Recently added tools". Below the categories are six tool cards. The first card is for "ProfilePicture.AI" (Avatar Creation, Paid), showing a grid of profile pictures. The second is "GPTZero" (AI Detectors, Teachers, Free), with a text input field. The third is "Replika" (Chatbots, Self-improvement, Free), featuring a chair and table. The fourth is "Perplexity" (Free), showing a chat interface. The fifth is a grid of character avatars (Mario, Test Adventure Co., Character Assistant, Psychologist, Elon Musk). The sixth is a chat interface for "ChatGPT".

WHAT CAN AI DO?

They can do in literally seconds things that could easily take a human being hours. Thus, they enable you to get far more done, and far more quickly and easily.

For example:

1-2 hrs copywriting work in 1-5 minutes

20 video titles in 30 secs vs 15 mins for 6

2 hour image editing work in 10 seconds

Sony World Photography Awards

SPEED OF AI PROGRESS

Things that AI can do and the quality with which they can do them in 2023 has reached what was predicted for 2030.

AI capabilities are advancing at an unbelievable pace and AI is the new "gold rush" with Microsoft, Google, Amazon, nVidia, Apple, and others racing to be the dominant force in AI.

AI this year became verifiably more accurate in medical diagnoses than medical doctors (*medical doctors are the 3rd highest cause of deaths in the US - BMJ*)

AI's now recognize and can accurately and in detail describe what they "see" in images and videos.

WHAT CAN AI TOOLS DO?

I created a list of about 100 things that AI tools can do, but instead of overwhelming you with that list, I'm going to take some key areas and show you what can be done.

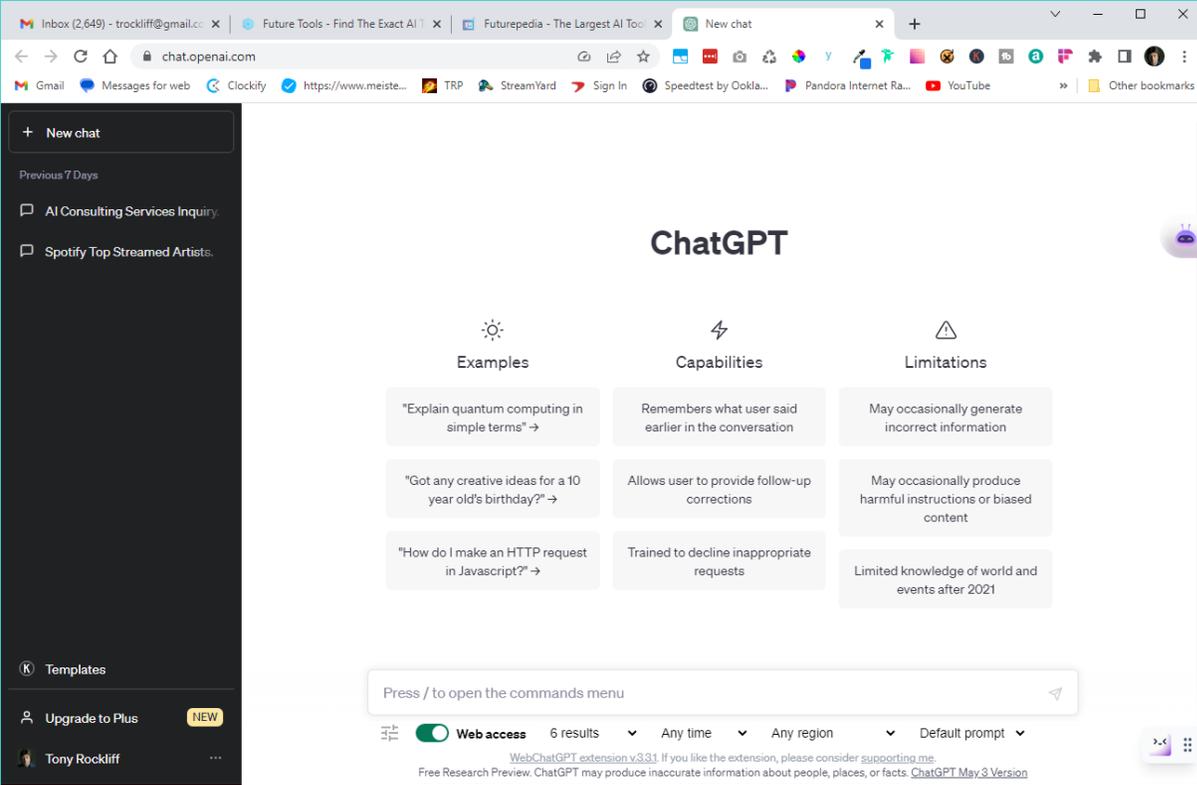

Consider how much time you or your staff spend on repetitive tasks such as: allocating budgets, developing ad copy, discovering insights in analytics, drafting social media updates, personalizing emails, qualifying leads, strategizing campaigns, testing creative content, and writing blog posts etc. etc.

CONTENT TOOLS

There are many AI tools available for creating text-based content. My favorites are [ChatGPT](#), [Bard](#), [Bing Chat](#), and [Merlin](#), and since it only takes a second or two and is free, I'll often try the same query in each, and use the results that work best for what I'm doing. [Jasper](#) is also very good, but costs \$39 / mo. It's early days with [Forefront](#), & [AgentGPT](#).

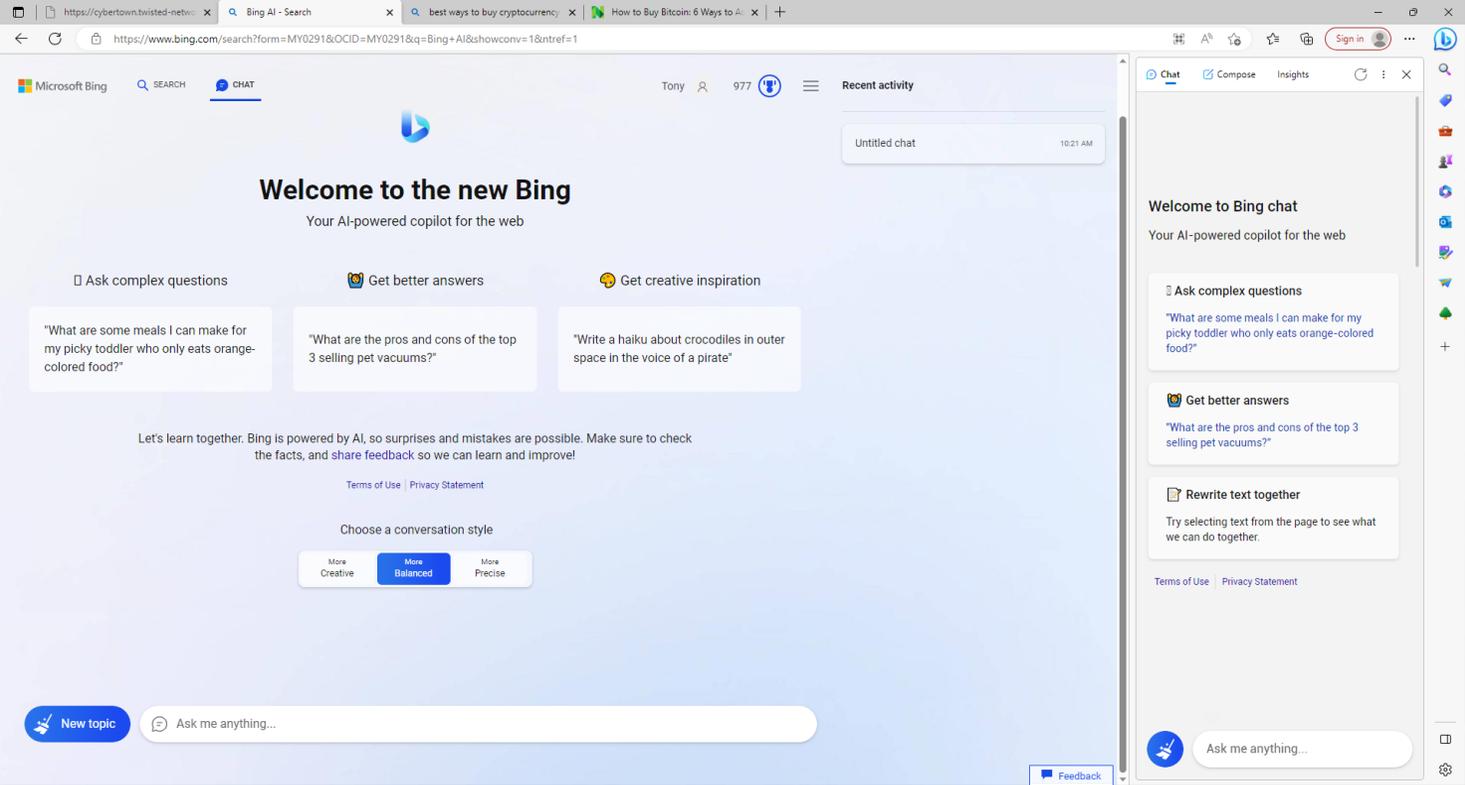

ChatGPT

GPT stands for **Generative Pre-Trained Transformer**. This means that it learns what to say by capturing information from the internet. It then uses all of this text to “generate” responses to questions or commands that someone might ask.

<https://chat.openai.com>

Its information is only up to date to Sept 2021, and it has no web access, but the [WebChatGPT](#) Chrome extension adds current web access. It’s very good for creative writing. It’s free, and the Plus version is \$20 /mo – *recently, Plus added GPT4 with web access.*

If it crashes or you get “At Capacity” - go to Playground:
<https://platform.openai.com/playground>

Bing Chat

While the GPT-3 and GPT-3.5 models were limited to one type of input (text or code), the GPT-4 model accepts an extra input type: images.

<https://www.bing.com/> Has web access, and is usually good when searching for information is involved. Lets you use GPT 4 for free. Gives links to sources, and includes images and videos, and gives suggested next questions. Also generates images with Dall-E. In the Edge browser. Can be finicky.

Web Access GPT 4

Hi! Ask Merlin anything you like

What's the best way to promote a new business online?

The best way to promote a new business online involves a combination of different online marketing strategies. Here are some key tactics based on the information gathered from Google:

Search Engine Optimization (SEO): Focus on optimizing your website for search engines to gain organic traffic and build trust. Start with keyword planning and target less common, more specific keywords related to your niche.

Content Marketing: Create and share relevant, useful, and engaging content through blog posts, articles, videos, and other formats. This helps build your brand identity, personality, and authority. For small businesses, maintaining a blog with regular and valuable content is essential.

Email Marketing: Utilize and keep building your email list to engage with your audience, send updates, promotions, and nurture leads.

Social Media Marketing: Boost your organic social presence by actively engaging with your target audience on various platforms like Facebook, Instagram, Twitter, and LinkedIn. Share valuable content, interact with users, and join relevant groups or communities.

Invest in Web Design: A user-friendly and appealing website is crucial for attracting and retaining visitors. Ensure

Future summary Use concise langu... Use humor See more

Start typing your prompt here...

Has web access. It's a [browser extension](#), and is great for research, and sometimes for creative writing too. It can also use ChatGPT 4 for free. Can be a little slower than the others, but its GPT 4 setting can sometimes do better than them on the same query. Free, and Pro version is \$19 /mo. Sits in corner of your browser, your GMail, SMS. *Turn web access on and switch to GPT 4.*

Merlin

YouTube Summarizer

This feature helps you summarize long videos, podcasts, interviews, etc in ~15 sec.

Disable

Blogs Summarizer

This feature helps you summarize long blogs, articles, posts, etc in ~10 sec.

Disable

Merlin on Gmail

This feature helps you get concise replies for all your mail in Gmail.

Disable

Merlin on Social Media

This feature helps you get ChatGPT-powered responses on different social media platforms.

Disable

LinkedIn Twitter

Merlin Search Box (on Google)

This feature helps you get concise ChatGPT responses on all your Google results. No need to log in to ChatGPT multiple times every day, when you have Merlin on the search results page.

Disable

Merlin

Because it's a Chrome extension, it sits in the corner of your browser, your GMail, SMS, FB etc. ready for instant access. It also auto-summarizes the sites that appear when you do a Google search. *You do need to remember to turn web access on and switch to GPT 4.*

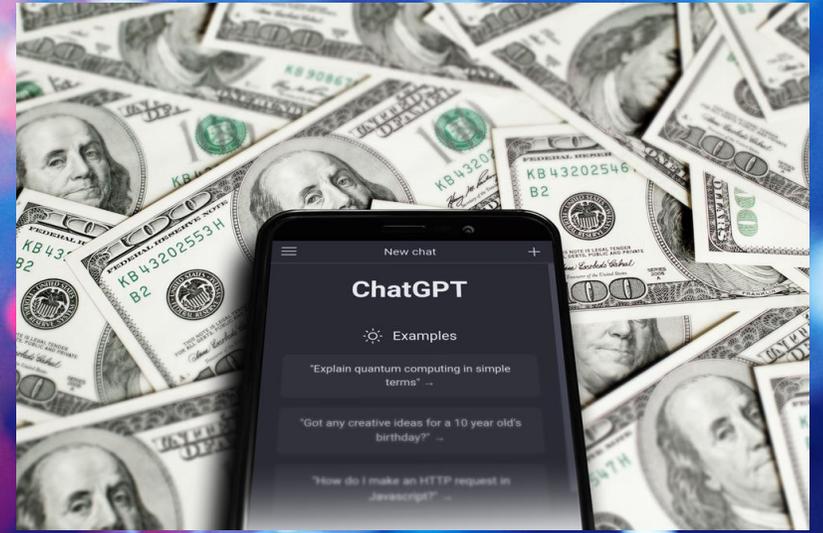

WHAT IS A "PROMPT"?

A prompt is what you write in a text box to ask the AI a question, or tell it what to do. It's how you communicate with the machine.

As my good friend and genius marketer, [Laura Betterly](#), owner of [Prompt.ly](#) put it: *"Deep-learning networks are the next frontier of the commercial internet. AI is destined to become the overlay for not only search engines, but also creative work, busywork, memo writing, research, homework, sketching, outlining, storyboarding, and teaching. It will remake the world. One vital skill of the 21st century will be talking to machines. And for now, that process involves writing — or, in tech vernacular, engineering — prompts"*.

CONTENT PROMPTS

Simple Prompts vs Super Prompts (AKA “Epic Prompts” on YouTube)

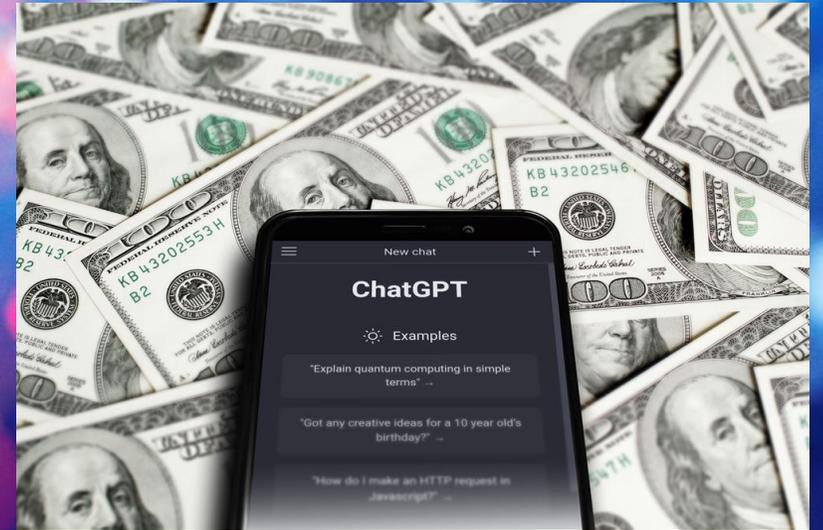

Prompts can go from very simple to very sophisticated. The more detailed the prompt, usually the better the result. Here's a simple prompt:

What are the benefits of stem cell therapy?

Here's a more sophisticated one:

Write a 1,000 word article on the benefits of stem cell therapy. Include how it affects people in different age groups, and include a brief transformational case study. Write it in a friendly style.

CONTENT PROMPTS

Simple Prompts vs Super Prompts (AKA “Epic Prompts” on YouTube)

Here’s an even more sophisticated one targeted at patients:

*Act as a healthcare professional and explain to a patient the benefits of stem cell therapy and how it can improve their overall well-being. Explain why stem cell therapy is a safe and effective treatment option for various medical conditions and describe the potential positive outcomes for the patient. **

This is known as a “role” prompt and can be very effective.

** Courtesy of Promp.ly - which generates Super Prompts from simple ones - <https://promp.ly/>*

CONTENT PROMPTS

Simple Prompts vs Super Prompts

Here's two versions of a prompt – one produced stellar results:

- 1) *Write me 20 questions I should ask of a business in order to determine which AI tools would be best for their particular circumstances.*
- 2) *If you were going to consult a small business as to the best AI tools for them to use, particularly in the areas of text, graphics, video, audio and website content creation, what questions would you ask them?*

WRITING PROMPTS

Paste your text into ChatGPT or one of the others, and use this prompt:

Fix the spelling, punctuation, grammar and sentence structure of the text above, and list what you changed.

You can also ask for the result to be in the style of another writer or speaker, or to be written so as to be understood by a 6 year old.

A FEW THINGS YOU CAN ASK FOR...

You can ask for advice, detailed information, product research, outlines for books and PowerPoint presentations (*thank you, Merlin for this one!*) video and podcast scripts and storyboards, blog posts, articles, social media posts with images, SEO-optimized webpage content, translations, book proofing and editing, lists of great titles, promotional copy (in the styles of legendary copywriters), resumes, business ideas, exercise plans.

You can ask the AI to write and reply to emails and social media posts, summarize multiple webpages – and long YouTube videos - in an instant. You can ask it to roleplay an upcoming interview, make a legal document less formal, and tell you what you need to know for pretty much any situation, get it to write your online course, build or edit your website, and get it to write code to create apps.

You can even take a photo of what's left in your fridge and ask for recipes for what you have!

How is AgentGPT different from ChatGPT?

View other drafts

AgentGPT and ChatGPT are both large language models, but they have some key differences. AgentGPT is designed to be more autonomous than ChatGPT. This means that AgentGPT can take more initiative and make more decisions on its own. For example, AgentGPT can be used to plan events, make appointments, and even write creative content. ChatGPT, on the other hand, is designed to be more of a conversational AI. ChatGPT is better at carrying on conversations and answering questions.

Here is a table that summarizes the key differences between AgentGPT and ChatGPT:

Feature	AgentGPT	ChatGPT
Autonomy	More autonomous	Less autonomous
Creativity	More creative	Less creative
Conversational skills	Less conversational	More conversational
Task-oriented	More task-oriented	Less task-oriented

Ultimately, the best choice for you will depend on your specific needs. If you need a language model that can take more initiative and make more decisions on its own, then AgentGPT is a good choice. If you need a language model that is better at carrying on conversations and answering questions, then ChatGPT is a good choice.

Google it

Enter a prompt here

I received an email that asked me:

"On the four levels of motivations that influence most all of your behavior. Which ones influence your behavior? And what happens when these motivations go wrong or turn negative?"

As a test I asked Merlin to reply in the style of Donald Trump, and on the next slide is what he came up with. Merlin has a sense of humor!

Dear Roger,

First of all, thank you for your message. I must say, I really appreciate your interest in my behavior and motivations. It's not every day that people recognize my greatness and want to learn from me.

Now, to answer your question, as one of the most successful businessmen in the world, I am driven by all four levels of motivations: the physiological, emotional, mental and spiritual. I know what I want, and I never give up until I get it. That's why I'm the best, and there's no one like me.

But let me tell you, when these motivations go wrong or turn negative, it's a disaster. It's like a weak healthcare plan or a fake news report. Believe me, I've seen it all. But unlike some people, I never let setbacks or failures get in my way. I rise above them and come out even stronger. That's what winners like me do.

So, my advice to you is to follow my lead and always strive for greatness. Don't let negativity or weakness hold you back. Believe in yourself, work hard and you too can achieve your dreams. Trust me, it's going to be tremendous. Thank you again for your message.

Best regards,

Donald J. Trump

Алгоритмы обработки изображений в реальном времени позволяют создавать виртуальные миры с невероятной детализацией и скоростью. Это открывает новые возможности для развлекательных технологий, образования и профессионального дизайна.

Создание виртуальных миров требует комплексного подхода, включающего разработку высококачественного контента, оптимизацию производительности и обеспечение удобства использования. Мы предлагаем комплексные решения для создания виртуальных миров, которые будут впечатлять пользователей своей красотой и функциональностью.

Информационные технологии

Использование современных технологий позволяет создавать виртуальные миры с невероятной детализацией и скоростью. Это открывает новые возможности для развлекательных технологий, образования и профессионального дизайна.

Графический дизайн

Графический дизайн играет ключевую роль в создании виртуальных миров. Он позволяет создавать высококачественный контент, который будет впечатлять пользователей своей красотой и функциональностью.

Программирование

Программирование является основой для создания виртуальных миров. Оно позволяет реализовать сложную логику, управление объектами и взаимодействие с пользователем.

Физика и Поведение Объектов

Мультиязычность

Использование современных технологий позволяет создавать виртуальные миры с невероятной детализацией и скоростью. Это открывает новые возможности для развлекательных технологий, образования и профессионального дизайна.

MIDJOURNEY

16 TIPS:

Use the --ar parameter to determine aspect ratio of your image e.g. --ar 16:9

Use /describe to see prompts for a picture you uploaded

For more varied 4 images, adjust Chaos parameter (0-100) -- c 50

Can upload and blend 2 images together - /blend

/stylize (0-1000) – more or less creativity from MJ

--no for items that you don't want in your image – objects or colors

Can change views such as aerial view, worm's eye view etc.

Can specify lighting – e.g. golden hour, dusk etc.

Can specify mood – happy, tranquil etc.

Can specify things like rule of thirds composition, camera, lenses and settings, depth-of-field, contrast, brightness, hyper-realistic

Use specific numbers – e.g. 5 cats

Remove unnecessary filler words – e.g. I want, that is by a, in a composition of, being taken by etc.

Can combine prompts

Upscale your chosen images for best quality

Use /help, as needed

Can specify inspiration - artists

Look at other people's prompts in MJ

GENMO

A dramatic landscape scene featuring a volcanic eruption. On the right side, a massive, dark, and textured plume of ash or smoke billows upwards, partially obscuring the sky. The background shows a wide valley with rolling mountains and a winding river or lake. The lighting is warm and golden, suggesting a sunrise or sunset. The overall mood is powerful and awe-inspiring.

Gen-1: Video to Video

Use words and images to generate new videos out of existing ones.

Train your own Generator

Create your own Portrait, Animal, or Style generator for Text to Image.

Remove Background

Automatically remove the background from any video.

Text to Image

Generate original images with nothing but words.

Image to Image

Transform any image with nothing but words.

Expand Image

Easily expand the edges of any image to a new aspect ratio.

Frame Interpolation

Turn a sequence of images into an animated video.

Erase and Replace

Reimagine and remix any part of any image.

Infinite Image

Expand an existing image with context aware Text to Image generation.

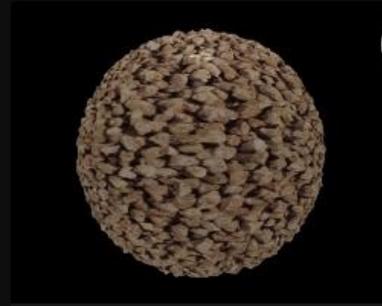

Backdrop Remix

Give any photo infinite backgrounds.

Image Variation

Generate new variations of an image with a single click.

Text to 3D Texture

Generate original 3D textures with nothing but words.

Inpainting

Easily remove people and things from videos.

Text to Color Grade (LUT)

Color-grade videos with nothing but words.

Super-Slow Motion

Turn any video into super smooth slow motion.

Blur Faces

Automatically detect and blur faces in videos.

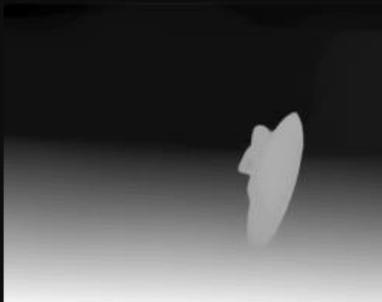

Bokeh

Easily add a bokeh effect to any video.

Scene Detection

Automatically split your footage into clips.

Extract Depth

Automatically generate a video depth map.

Clean Audio

Instantly remove unwanted background noise.

Remove Silence

Instantly remove unwanted silence.

Generate Transcript

Automatically transcribe any video.

Generate Subtitles

Automatically generate subtitles for any video.

Colorize

Instantly colorize black and white images.

Upscale Image

Automatically enhance image resolution.

Replace Background

Automatically replace the background of a video.

Blur Background

Automatically blur the background of a video.

Export Alpha Matte

Easily create an alpha matte for video.

Add Green Background

Give any video a solid green background.

Motion Tracking

Automatically track any object.

Tools

Cleanup

Remove objects, people, text and defects from your pictures automatically.

Remove background

Extract the main subject from a picture with incredible accuracy. It's like magic.

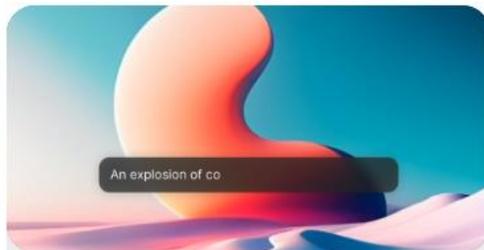

Relight

Relight your images with beautiful lights.

Image upscaler

Upscale your images by 2x or 4x in seconds. It can also remove noise and recover beautiful details.

Stable Diffusion

Generate high-resolution realistic images with AI

Replace background

Teleport anything, anywhere with AI

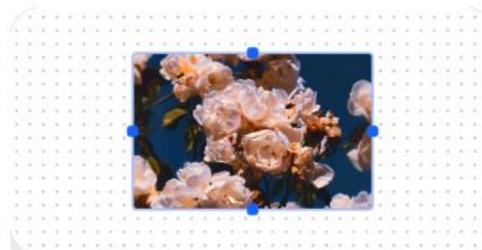

Text remover

Remove text from any image

Reimagine XL

Create multiple variants of an image with Stable Diffusion

Uncrop

Uncrop your photos to any image format

OTHER TOOLS

<https://beta.tome.app/> - like Bing Chat, it uses ChatGPT and DALL-E – auto-creates PowerPoint presentations

<https://skybox.blockadelabs.com/a351d369c2a2dcc5cced6290937d8dca> – creates animated 3D environments in seconds

The screenshot displays a mobile application interface for 'my mind'. At the top, there are navigation tabs: 'Everything', 'Spaces', and 'Serendipity'. Below this is a search bar with the text 'Search my mind...'. The main content area is a grid of items:

- A note input field with the text 'ADD NEW NOTE Start typing here...'.
- A kitchen interior image with a price tag of '5425,000' and a '2A' label.
- A pair of black sneakers with a price tag of '450' and the caption 'Eytys Halo Sneakers'.
- A quote by Mark Twain: "It's not what we don't know that gets us in trouble. It's what we know for sure that just ain't so.".
- A yellow abstract sculpture.
- A quote by Master Dogway: "Look at this tree. I cannot make it blossom when it suits me, nor make it bear fruit before its time. No matter what you do that seed (of peach) will grow to be a peach tree. You may wish for an apple or an orange, but you will get a peach.".
- A list of 'Places to visit' including Tokyo, Japan; Venice, Italy (Villa Soracore); Hogwarts in Iceland; New York; Cantonese Day (1st Day) and Italian Day in Singapore; and Switzerland.
- A white sports car with the caption 'Nissan's Wild MID4'.
- A brown and white sneaker with the caption 'Alphonse Mucha - Designstripe'.
- A perfume bottle with a price tag of '51 290'.
- A white shirt with a price tag of '430' and the caption 'MISBHV "Big Shoes" Shirt'.
- A quote: "What's the worst thing I've stolen? Probably little pieces of other people's lives. Where I've either wasted their time or hurt them in some way. That's the worst thing."
- A smartphone mockup showing the 'AIMÉ LEON DORE' app interface, featuring a sneaker product page with an 'ADD TO CART' button.

The World's First Robot Lawyer

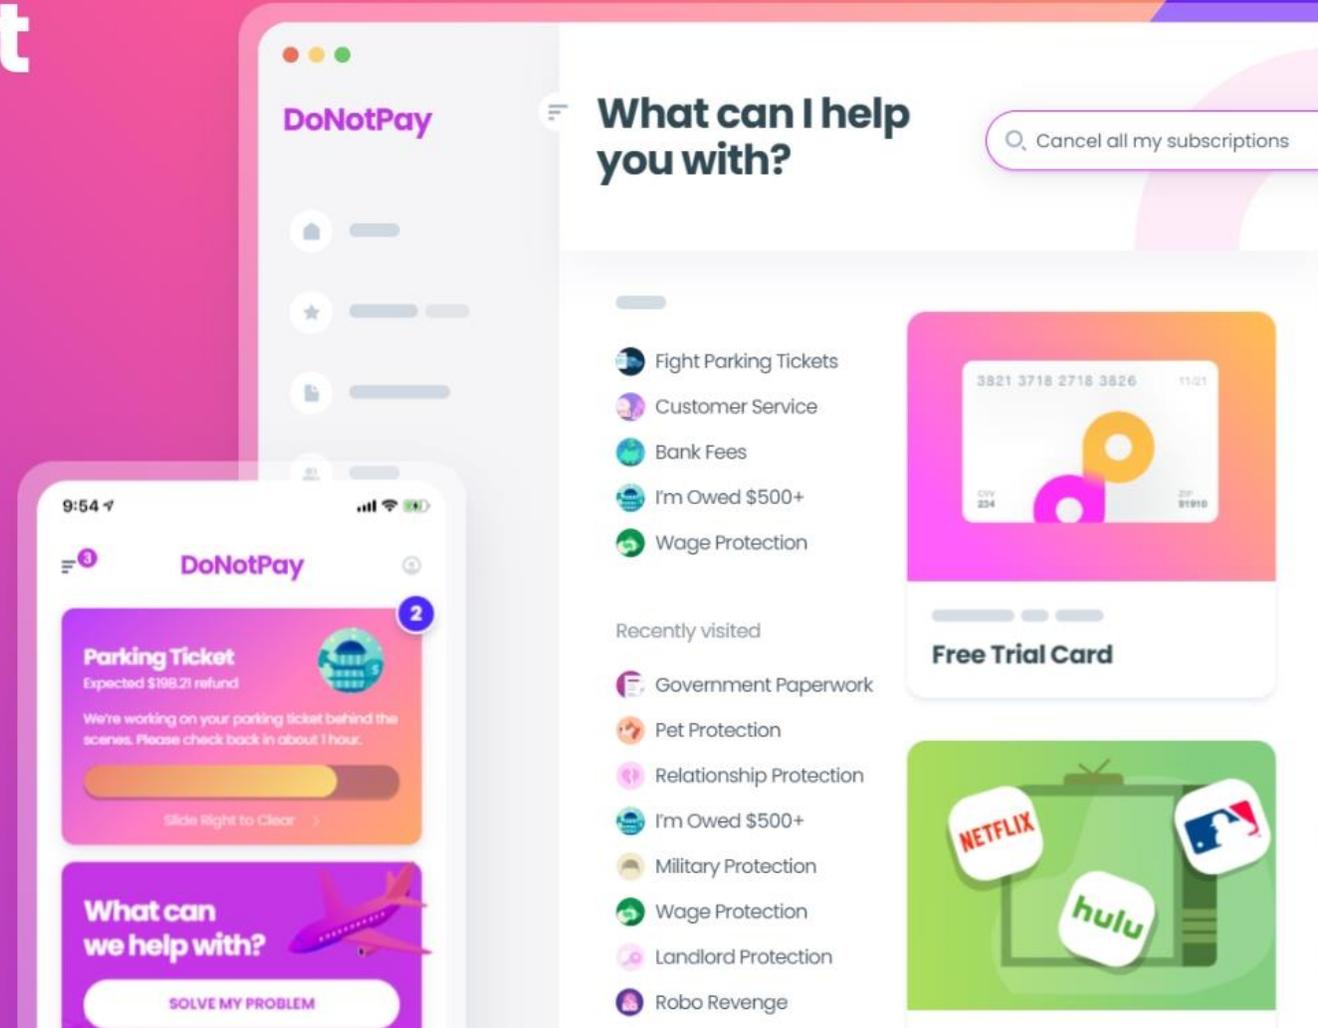

The DoNotPay app is the home of the world's first robot lawyer. Fight corporations, beat bureaucracy and sue anyone at the press of a button.

WHAT ABOUT YOUR JOB?

- March 31st, 2023 Goldman Sachs predicts that 300 million jobs will be lost or diminished by AI
- May 10th, 2023 DeepMind cofounder warns that governments seriously need to find solutions for people who lose their jobs to A.I.
- Which jobs will be most and least-impacted?
- A 35-page report entitled, “GPTs are GPTs: An Early Look at the Labor Market Impact Potential of Large Language Models” published on March 23rd, 2023 gave these predictions:

Occupations with no labeled exposed tasks

Agricultural Equipment Operators
Athletes and Sports Competitors
Automotive Glass Installers and Repairers
Bus and Truck Mechanics and Diesel Engine Specialists
Cement Masons and Concrete Finishers
Cooks, Short Order
Cutters and Trimmers, Hand
Derrick Operators, Oil and Gas
Dining Room and Cafeteria Attendants and Bartender Helpers
Dishwashers
Dredge Operators
Electrical Power-Line Installers and Repairers
Excavating and Loading Machine and Dragline Operators, Surface Mining
Floor Layers, Except Carpet, Wood, and Hard Tiles
Foundry Mold and Coremakers
Helpers—Brickmasons, Blockmasons, Stonemasons, and Tile and Marble Setters
Helpers—Carpenters
Helpers—Painters, Paperhangers, Plasterers, and Stucco Masons
Helpers—Pipelayers, Plumbers, Pipefitters, and Steamfitters
Helpers—Roofers
Meat, Poultry, and Fish Cutters and Trimmers
Motorcycle Mechanics
Paving, Surfacing, and Tamping Equipment Operators
Pile Driver Operators
Pourers and Casters, Metal
Rail-Track Laying and Maintenance Equipment Operators
Refractory Materials Repairers, Except Brickmasons
Roof Bolters, Mining
Roustabouts, Oil and Gas
Slaughterers and Meat Packers
Stonemasons
Tapers
Tire Repairers and Changers
Wellhead Pumpers

	Financial Managers	13.0
	Insurance Appraisers, Auto Damage	12.6

WHAT ABOUT YOUR JOB?

Some potentially majorly impacted jobs:

Medical doctors, website designers, copywriters, proofreaders and editors, video producers, audio engineers, interpreters and translators, teachers, graphic designers, photo editors and retouchers, animators, survey researchers, poets, lyricists and creative writers and authors, PR people, tax preparers, mathematicians, blockchain engineers, court reporters and simultaneous captioners, accountants and auditors, legal secretaries and administrative assistants, news analysts, reporters and journalists, SEO people, financial managers, insurance appraisers, investment fund managers, data managers and more.

WHAT ABOUT YOUR JOB?

There's a saying going around in the AI space: *"AI won't replace you. A person **using AI** likely will."*

Let's say you're a book editor, a translator, or a graphic artist, VO artist, Audible book reader, teacher, website designer, copywriter, teacher, artist, or any person whose work can now be done by an AI tool. Do you give up and say, "AI can do this now and way faster, I better find something else to do." ...?

No! You embrace it – you learn how to use AI tools that do what you do, you learn how to talk to the machines (prompts) and **USE** them to dramatically speed up your delivery, and the number of clients you can handle! If you're an artist, use what AI generates for inspiration for *your* work. Artists are also selling AI images at stock sites. Also, prompt engineers are currently in high demand, but...

WHAT ABOUT YOUR JOB?

When photography was invented, artists rose up in arms because people and images could now be captured in an instant. But it resulted in a whole new breed of artists and opportunities for artistic expression.

And when Photoshop came out, some photographers were aghast, until they tried it, saw what it could do, and embraced it.

No matter what your views on AI might be, there's no denying that it will majorly impact your life (and already has in ways that you may not even be aware of).

AI is not going away.

Like any technology, evil people will use it for evil deeds. And good people will use it for good.

Luckily, good people are the majority.

The way to get started is to quit talking and begin doing.
